Boomi Professional Integration Developer

## PROJECTS

### Recipe Sharing Platform - [GitHub](#)

Full-stack web app for sharing and discovering recipes. React, TypeScript, Redux, TailwindCSS, Node.js, Express.js, Passport.js, PostgreSQL. Implemented authentication, role-based access, RESTful APIs, advanced search, pagination, and Tinder-like swipe feature. Integrated OpenFoodFacts API for ingredient suggestions.

### TrackDuel - [GitHub](#)

React-based music discovery platform with head-to-head track battles. Features Spotify integration, playlist building, and interactive onboarding for a personalized music discovery experience.

### Weather Finder App - [GitHub](#)

Responsive React app fetching data from OpenWeather API and Google Maps API to display current weather, 4-day forecast, and map location. Implements efficient search and clean data presentation for multiple locations.
